This publication contains practical good practice guidance for use by site operatives and supervisors involved with street works under the New Roads and Street Works Act 1991. This guide includes relevant reference material from the code of practice "Specification for the reinstatement of openings in highways" (2002. ISBN 0115525386) which has been approved under s. 71 of the 1991 Act, but this guide is not intended as a replacement or abbreviated version of the Code. The guide covers the process from signing and excavating issues to reinstating and leaving the finished site, and for each section information is given on specification details and key tasks, as well as health and safety issues.

This volume presents papers from the 8th International Symposium on Environmental Vibration and Transportatation Geodynamics (ISEV2018). It covers the latest advances in the areas of environmental vibrations, and its impact on dynamic vehicular loading, transportation infrastructures and the built environment. This volume will be of interest to policy-makers and researchers in academia, industry and government.

"The proposed book focuses on the principles and design of ground improvement technologies"--
