Music is an expression of feelings of the soul conveyed through the medium of sound. But not all sounds are music. It might be said that only an organised sound or series of sounds can be called music. Thus, music is connected to the eternal and constant flow and order of the universe, to the laws and rhythms of nature. It can also be said that musical order is comparable to the natural order of the universe. There are laws of a certain nature in the natural sciences and likewise in music there are structures and procedures, or even rules, that should be followed to produce beautiful music. The International Conference "Innovations for 21st Century Music Education and Research" provided a timely opportunity to take stock of the latest developments in music education and brought together educators, researchers and members of the broader community in a welcoming forum in which they were able to express theoretical and practical views, concepts, research results and principles to help support the further development of music education.

In this book I have aimed at completeness in the sense that all publications known to me, which are wholly or partly devoted to Malay and Bahasa Indonesia (B.I.), or are important for the study of these languages, have been included. Popular publications in non-professional periodicals have been included only exceptionally. All the publications mentioned in the text are incorporated in the Bibliography (p. 91-157). The countless articles in four post-war, semi-professional periodicals in : '1alaya and Indonesia, Dewan Bahasa, Pembina Bahasa Indonesia. 11:1 edan Bahasa, Bahasa dan Budaja, are not mentioned separately in the Bibliography, but sections 33 to 36 contain a survey, as complete and systematic as possible, of the contents of these periodicals in so far as they pertain to the Malay language; nor have I discussed in the text or incorporated in the Bibliography several hundreds of titles of practical textbooks or school-books of Malay or B.I. which are of no importance to the scientific study of these language. These titles have been entered in a separate Appendix (p. 158--171). The fact that completeness was aimed at certainly does not mean that it has been achieved. Especially various recent writings from Indonesia and Malaya may have escaped my attention.

Experience has also proved that publications on Malay sometimes appear in the most unexpected places. The qualification above: "publications ... devoted to ... , or important for the study of" Malay and B.I. has been taken in a wide sense.
