College Prep 101 is a handbook for those involved in the process of selecting, applying to and enrolling in college. It's an excellent resource for students, parents, and educators alike, and no high school library or counseling office should be without a copy. Readers are walked through each step of the college application and selection process, from planning for college to college visits, and choosing a college to college entrance exams. Checklists are provided for each year of high school, listing the important steps to take each year, and there's even a list of items to pack and take to college when the time comes. Finances feature prominently within the pages, as the chapter entitled College and Money provides direction through both applying for scholarships and the financial aid process. In addition, decision making and prioritizing are discussed as bases for spending decisions while the student is actually in college. Millis' second title, "How to Go to College Cheaper" goes into great detail on this topic. The transition from high school to college is also discussed, including extensive coverage of study skills and time management. Students are encouraged to find their own system or style of studying through answering six simple questions and using whichever of the suggested strategies are most effective for them. Organization, prioritization, and decision making are discussed as the basis for effective time management - a skill many college students struggle with. Parents too will find information written specifically for them inside, with their own list of "must-do" items, a chapter detailing how they can help their student through this process (and deal with it themselves), and specific suggestions hi-lighted throughout the book. The book's thirteen chapters cover all the bases without boring the reader with unnecessary text. It is written in a straight-forward, conversational style that is easy to read, and the numerous lists provide excellent resources you'll refer to again and again.
